Course Overview

his training program covers the essential concepts and practices in finance and accounting, providing participants with a strong foundation in financial management and accounting principles. It empowers participants to make informed financial decisions and apply accounting techniques effectively within their organizations.

Course Objectives

By the end of the Fundamentals of Finance and Accounting training course, you will be able to:

- Demonstrate a solid understanding of the core principles and practices of finance and accounting.
- Strengthen your ability to analyse and interpret financial statements with confidence.
- Develop accurate financial forecasts to support a wide range of business decisions.
- · Apply proven techniques for effective investment decision-making.
- Contribute actively and knowledgeably to budgeting and strategic planning processes.

Target Audience

- New finance and accounting professionals.
- Business managers and executives.
- Entrepreneurs and business owners.
- Non-financial managers seeking financial literacy.

Methodology

This Fundamentals of Finance and Accounting training course will be structured as a highly participative training course with formal presentations, case studies and interactive worked examples. Relevant examples and case studies illustrate the application of each of the topics covered and ample opportunities are provided to develop useful and practical business finance skills that can be effectively applied in your work environment.
