

Course : Financial Analysis, Planning & Control

City :	London	Hotel :	The Ritz London
Start Date :	2025-11-24	End Date :	2025-11-28
Period :	1 Week	Price :	5950 \$

Course Overview

Management has become an essential component of operations across a wide range of organizations. Understanding financial analysis, planning, and control is critical for gaining insights into various organizational aspects, from quantitative calculations to broader operational practices. This program emphasizes the practical application of financial models and analytical techniques to evaluate both the strategic and operational positions of an organization.

Effective financial analysis is vital for organizations aiming to optimize costs and generate additional value. Participants will gain knowledge of the financial business environment, strategic planning processes, management reporting, and decision-support mechanisms.

The Financial Analysis, Planning & Control training course is designed to provide participants with a comprehensive understanding of the decision-making process, diverse valuation methods, and the interpretation of financial information for strategic advantage.

Key learning outcomes of this course include:

- Understanding the conceptual framework for financial and economic analysis and its role in decision-making.
- Examining the structure of financial statements and applying key financial tools and techniques to assess business performance.
- Projecting financial requirements and analyzing information to support planning and control functions.
- Evaluating investment decisions using time-adjusted measures, considering strategic perspectives, and addressing risk and uncertainty.
- Valuing businesses and exploring methods to enhance value through mergers, acquisitions, restructuring, and reorganizations.
- Developing and monitoring key performance indicators, reporting on trends, and identifying the causes of unexpected variances.

Course Objectives

By the end of this training you will learn to:

- Evaluate capital investments, financing options and cash flows
- Evaluate business operations, processes, managers and capacity utilisation

- Use the information provided in financial statements for analysing the financial performance
- Forecast future business conditions

Target Audience

Professionals working in accounting and finance

Financial controllers, finance managers, financial systems analysts, senior accountants, financial accountants, management accountants

Chief Financial Officers (CFOs), finance directors and strategic planners

Methodology

The program will be delivered through a mix of **interactive lectures, case studies, hands-on exercises, and group discussions**. Participants will use **financial models, Excel tools, and real-world examples** to apply concepts of analysis, planning, and control. The approach ensures both **conceptual understanding** and **practical application** to support better financial decision-making.
