Course Overview

The Agile Project Management Practitioner Preparation Course is designed to prepare participants to effectively apply Agile methodologies in complex project environments and to successfully achieve Agile Practitioner certification. This course provides a thorough understanding of Agile principles, practices, and frameworks, including Scrum, Kanban, and Lean, with a strong focus on practical application, real-world case studies, and exam preparation strategies. Participants will gain the skills to manage Agile projects, lead Agile teams, facilitate ceremonies, and deliver value-driven project outcomes consistently.

Course Objectives

By the end of this course, participants will be able to:

- Understand Agile principles, values, and mindset at an advanced level.
- Apply Agile project management techniques in real-world scenarios.
- Facilitate Agile ceremonies such as Sprint Planning, Daily Stand-ups, Reviews, and Retrospectives.
- Manage Product and Sprint Backlogs, prioritize tasks, and track progress using Agile metrics.
- Identify and mitigate project risks in Agile environments.
- Prepare effectively for the Agile Practitioner certification exam.

Target Audience
