

Course : Treasury And Cash Management

City :	Abu Dhabi	Hotel :	Emirates Palace
Start Date :	2025-11-24	End Date :	2025-11-28
Period :	1 Week	Price :	3950 \$

Course Overview

Cash and Treasury Management can be understood as the planning, organizing and controlling holding, funds and working capital of the enterprise in order to make the best possible use of the funds, maintain a firm's liquidity, reduce the overall cost of funds, and mitigate operational and financial risk.

Treasury Management aims to ensure that adequate cash is available with the organization, during the outflow of funds. Further, it also contributes to optimum utilization of funds and makes sure that there are no unutilized funds kept in the firm for a very long term

This course is designed for finance, treasury and banking professionals who need to gain a deeper practical knowledge of cash and treasury management techniques.

The course will assist the delegates with an in-depth understanding of complexities linked with cash and treasury management functions.

Course Objectives

This Treasury and Cash Management Training Programme will enable the delegates to:

- Enhance financial management skills for managing liabilities, liquidity and assets issues
- Demonstrate the diverse types of risks linked with global organizations specifically exchange, interest, credit and commodity pricing risks and sources identification and risk management methodologies
- Identify the responsibilities, roles, strategies and tools linked with treasury management including international procedures and best practices
- Analyze the basic fundamentals of cash management to improve organizational cash flows and boost portfolio investment returns.

Target Audience

This Treasury and Cash Management Training Course is Ideal for:

- Financial decision-makers and managers
- Professionals who are responsible for the execution of financial decisions
- Professionals who are responsible for cash management and treasury functions
- Professionals who are willing to enhance their careers in the field of finance

- Supervisory professionals who are responsible for monitoring financial risks namely credit, liquidity, exchange rate or interest rate risks

Methodology

The course uses interactive techniques, such as brief presentations by consultants and participants. It also features several group exercises, case studies, interactive discussions, and practical simulations to help participants consolidate their learning experience.
