Course Overview

This seminar provides an understanding of the essential fundamentals of corporate finance, financial strategy and financial management. Contemporary practical examples are presented together with the theoretical principles to make the theory come to life. The overriding objective of this seminar is to present a number of integrated and powerful principles to help develop analytical skills and the decision-making capacity of the participants.

It will enable you to:

- Appreciate the importance of using the appropriate financial strategy to create shareholder value above market expectations
- Consider how corporate behaviour impacts on achievement of corporate objectives, and the importance of corporate governance
- Understand financial strategy relating to stages of corporate development and capital structure
- Use and evaluate the various techniques of capital investment appraisal
- Effectively manage cash and working capital to reduce costs and improve cash flow

Course Objectives

At the end of this seminar delegates will be able to:

- Use and evaluate the various techniques of capital investment appraisal
- Develop appropriate financial strategies
- Relate financial strategy to business strategy
- Effectively manage cash and working capital to reduce costs and improve cash flow

Target Audience

Financial controllers, analysts, finance and accounting managers, supervisors, and finance professionals who need to interpret and analyze financial statements and use them to create financial forecast models in their organizations.

Methodology

A mixture of exercises and real-life case studies, examples, and videos make this a lively and interesting seminar. There is a strong emphasis on the practical application of the ideas within the delegates' organization. Delegates are encouraged to complete a learning and action plan to focus them on and help them to apply their new knowledge and skills.
