## Course Overview

The Oxford Advanced Finance Programme is a leading-edge 10-day training seminar designed for professionals who wish to master strategic management, financial planning, and financial management. It is ideal for those seeking to enhance their financial management skills or refresh and update their existing knowledge.

This comprehensive seminar equips participants with the tools and techniques necessary to make informed strategic decisions, maximize shareholder value, manage financial risk, and improve overall corporate performance.

### Key Highlights of the Programme

Strategic decision-making, financial planning, forecasting, and budgeting.

Understanding financial statements and their role in decision-making and budgeting.

Ratio analysis of the income statement, balance sheet, and statement of cash flows.

Costing methodologies: Traditional Costing, Activity-Based Costing (ABC), Activity-Based Budgeting (ABB), and Activity-Based Management (ABM).

Financing decisions, capital structure optimization, and Weighted Average Cost of Capital (WACC).

Performance measurement systems: linking KPIs to strategy using a Balanced Scorecard.

Financial risk management: interest rate and foreign currency exposure.

Capital project appraisal: discounted cash flow (DCF), business valuations, acquisitions, and restructuring.

## Course Objectives

### By the end of this programme, participants will be able to:

- Understand how business strategies are developed and supported by financial management.
- Identify and analyze business problems using relevant variables, trends, and relationships.
- Apply financial and economic analysis to support decision-making.
- Assess the reliability of financial data and understand the impact of risk and uncertainty.
- Distinguish between cash flow and accounting profit in financial decision-making.
- Integrate qualitative judgments with quantitative financial analysis for informed decision-making.

## Target Audience

**This program is designed for professionals who need to strengthen their strategic financial management and decision-making capabilities. It is particularly valuable for:**

- Finance managers, controllers, and accountants
- Strategic planners and business analysts
- Project managers and investment decision-makers
- Department heads and senior executives involved in budgeting, forecasting, and financial planning
- Professionals seeking to enhance their knowledge of valuation, capital budgeting, and risk management

## Methodology

**The Oxford Advanced Finance Programme combines theoretical knowledge with practical application through:**

- Interactive presentations and discussions.
- Team exercises and participative workshops.
- Case studies and real-life examples.
- Hands-on exercises to reinforce learning and application.
- The seminar is designed for professionals with varying levels of financial knowledge, ensuring an engaging and practical learning experience.
- Delegates will gain both the skills and confidence to apply techniques directly in the workplace.

## Course Outline

### Day 1: Linking Strategy, Decision-Making, and Financial Planning

- Strategy, vision, mission, and objectives
