Course Overview

The Efficient Finance & Accounting Operations training course is a highly participative programme designed to equip delegates with the skills to conduct finance and accounting operations efficiently—from raising and investing finance to preparing financial statements and management reports.

This EuroMaTech course enables participants to support their organisation's strategic and financial objectives by adopting the most effective methods for financing growth plans and evaluating potential projects using Payback, NPV, IRR, and MIRR.

Additionally, the course develops core accounting skills with a focus on efficient bookkeeping, preparation of financial statements, cash flow and working capital management, budgeting, and costing.

Key Competencies Developed

Participants will enhance the following competencies:

- Analytical Skills: Evaluate finance and investment opportunities, as well as financial statements.
- Communication Skills: Present financial plans and make informed recommendations.
- Risk Management Skills: Identify, evaluate, and recommend appropriate risk management strategies.
- Management Skills: Make informed financial decisions to improve performance, cash, and liquidity management.
- Reporting Skills: Use financial assessments to support functional knowledge and decision-making.

Course Objectives

By the end of this course, participants will be able to:

- Recommend the most appropriate and efficient methods of financing.
- Evaluate and make informed investment decisions.
- Prepare accurate and comprehensive financial statements.
- Manage short-term liquidity and working capital effectively.
- Develop, implement, and control budgets efficiently.

Target Audience

This course is critical for the success of any organisation and is highly beneficial for:

- Finance professionals seeking to enhance their skills.
- Strategic managers evaluating the financial implications of major decisions.
- Operational, marketing, and production managers who liaise with finance departments.
- Professionals aspiring to manage departments where financial analysis and planning are key requirements.
- Risk managers seeking to adopt the latest techniques in financial risk management.

Methodology

The course combines interactive presentations, practical exercises, video materials, activities, and case studies. Delegates will actively relate the principles of Financial Planning & Analysis to their specific workplace needs. Comprehensive course notes and a clear glossary of key finance and accounting terms will be provided.

Course Outline

Day 1: Finance Operations - Raising Finance Efficiently
